**SUCCEEDING AS
A DEVELOPMENT STUDIO
IN TRADITIONAL
MARKETPLACES
IS DIFFICULT....**

With an estimate of 800,000 active games on the App Store, less than 1% of apps, and less than 5% of games are financially successful in the modern world.

If you're not Supercell, EA, Gameloft, or one of the top development studios, it can be tough to get a spotlight on your new game. Without featuring, studios are forced to spend thousands of dollars to market their game.
